## DETAILED ACTION

### *Restriction*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4-6, 20, 22, 23 and 25-30, drawn to a method of treating various diseases

Group II, claim(s), 9, drawn to a method of inhibiting beta-secretase activity

Group III, claim(s) 11-14, drawn to a method of inhibiting production of amyloid beta peptide in a cell

The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the compounds employed are already known in the prior art and each formulation comprises compounds having different variable core structures and corresponding functionalities.

Art Unit: 4173

Specifically, Maibaum et al. (US 5,641,778) discloses various compounds of formula I (see abstract). Additionally, the substituents on the structure vary extensively and when taken as a whole result in vastly different compounds.

In conclusion, there is a lack of unity of inventions and therefore restriction for examination purposed as indicated is proper.

### ***Species Election***

Claims 1-6, 9, 11-14, 20, 22- 23 and 25-30 are generic to the following disclosed patentably distinct species:

- (1) A compound of formula I
- (2) A compound of formula I-A
- (3) Various diseases

The species are independent or distinct because as disclosed the different species have mutually exclusive characteristics for each identified species. In addition, these species are not obvious variants of each other based on the current record.

Art Unit: 4173

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

**Specifically**, if Applicant elects the invention of Group I, II, or III Applicant is required to define each of R1, R2, and R3 and *any additional variables* as required for a single specific specie of a compound in claim 5 or claim 22.

**Additionally**, if applicant elects the invention of Group I, Applicant is further required to elect a single specific specie of disease to be treated.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Accordingly, **Applicants are required** to make a provisional election of (i) a **single independent and/or patentably distinct Invention** stated supra prior to an examination of said species on the merits (ii) **an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) and (iii) **identification of the claims encompassing the elected species, including any claims subsequently added**. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 4173

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

#### ***Inventorship Notice***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 4173

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
